

ABOUT OUR PROGRAMS

Through the years, we've seined in search of fish and crabs, hiked and biked along miles of wooded and coastal trails, paddled in some of the most scenic waterways on the East End, and come to know countless local plants and animals. We are committed to connecting children to the outdoors through exploration, adventure, hands-on learning and FUN!

This summer, Group for the East End's educators are offering 4 sessions for outdoor enthusiasts of various ages.

Parents/guardians are responsible for all transportation. For more information please email Steve Biasseti or Anita Wright (sbiasseti@eastendenvironment.org, acwright@eastendenvironment.org), or call Steve at 631-765-6450, ext.205.

Programs tend to fill quickly! Registrations are accepted on a first come, first served basis.

Summer Field Ecology Programs are best suited for children who have a curiosity and desire to learn about nature and enjoy being active outdoors!

PONDHAWKS (AGES 8 - 10)

PONDHAWKS is a great program for your budding young naturalist! Each day we visit a different habitat and get up-close with the plants and animals that live there. Children become active nature detectives, using dip nets, tanks, bug boxes, shovels and field guides to learn about life in the pond, beach, salt marsh and woods. This program aspires to spark your child's interest in the outdoors and plant the seed for a lifetime of stewardship and love of nature. We are offering two PONDHAWKS sessions this summer!
